SKILLS

Programming Languages (Go (Golang), Python, C/C++), **Frameworks** (Gofr, Gin, Django), **Databases** (PostgreSQL, MySQL), **Tools** (Postman, AWS, Docker, Kubernetes, Version Control / Git, GitHub Actions (CI/CD), REST APIs, Distributed Systems, Microservices, Data Structures & Algorithms, Monitoring & Alerting)

WORK EXPERIENCE

IMA360

Irving, Texas, US

Software Development Engineer

June 2025 - Present

- Reduced API **execution time by ~82%** and **cut memory usage by 99%**, significantly improving system scalability and performance. Implemented and monitored cloud-based services using **AWS CloudWatch, ECS, and Lambda**, optimizing performance and **increasing system uptime by ~30%**.
- Improved system reliability and **uptime by ~30%** by implementing **monitoring, alerting, and automated error-handling** for cloud-based services, proactively preventing production issues. Participated in **technical discussions and architectural planning**, contributing to the design of resilient and scalable cloud-based systems.

California State Polytechnic University

Pomona, CA, USA

Software Engineer

Oct 2023 - Oct 2024

- Led a backend development team** in designing, building, and optimizing **Golang-based microservices and REST APIs** for multiple university systems, **improving request throughput by ~55%**, reducing API **latency by ~38%**, and delivering major upgrades for the University Library System and Campus Job Portal **including ~45%** faster page loads, **30% fewer database calls**, and a smoother experience **for 30,000+ users**.
- Spearheaded performance tuning and reliability initiatives, **reducing bug resolution time by ~40%**, increasing feature **delivery efficiency by ~35%**, and implementing monitoring/observability for API performance, DB latency, and error tracking, **increasing overall system uptime by ~25%** and enabling proactive detection of issues.

ZopSmart Technology

Bangalore, India

Software Development Engineer

Jan 2022 - June 2023

- Analyzed and optimized **Golang-based backend** infrastructure, improving system **performance, stability, and SLA compliance by 40%**, while integrating Kafka-based event-driven communication across five microservices and optimizing database queries, enhancing application **performance by 40%** and **reducing critical API latency by 24 ms**.
- Championed engineering best practices by leading the adoption of TDD and implementing **GitHub Actions-based CI/CD pipelines**, reducing **regression issues by 50%**, **cutting deployment time by 40%**.

PROJECTS

Lane Detection in Severe Weather Condition | CARLA Simulator, Python, OpenCV, NumPy | [VideoLink](#)

- Formulated and executed a robust lane detection algorithm honed for superior performance in **adverse weather conditions including heavy rain, limited visibility at night, and foggy environments**, supplementing a wide range of CARLA sensors to rigorously evaluate its effectiveness across diverse vehicle models and urban environments within the simulation framework.
- Utilized advanced **image processing techniques** to achieve a **90% accuracy rate** in identifying and delineating lanes on roadways, showcasing expertise in computer vision applications.

Car Dealership Web API | Go, MySQL, Postman, AWS CloudWatch |

- Developed a high-performance **Web API** for a car dealership, streamlining inventory management processes and diminishing **manual errors by 40%**, while **improving data accuracy by 25%**.
- Constructed and implemented an API enabling streamlined **CRUD operations** for car and engine details, resulting in efficient inventory and engine management within the dealership's system; reduced **data entry time by 40%** and **minimized data errors**.

Online Salon Management System | Python, Django, MySQL, HTML, CSS, PostgreSQL | [Github](#)

- Designed a robust Online Salon Management System using **modern web technologies** to optimize appointment scheduling, leading to a **40% increase in bookings** and **25% reduction** in no-shows, with user/admin dashboards and integrated online payments **reducing manual data entry by 50%**.

EDUCATION

California State Polytechnic University

Pomona, CA, USA

M.S in Computer Science | CGPA : 4.0/4.0

Aug 2023 - Dec 2025

Dharmsinh Desai University

Nadiad, INDIA

B. Tech in Information Technology | CGPA : 8.3/10.0

July 2018 - May 2022
